

44-77N CMT AND 15-77 CMT

Even with extreme sales ice cream and shake with a constant high quality.

Ice cream and milkshake have an irresistible attractiveness. Even more if they are of a constant high quality, then your clients will come back for more! With an Electro Freeze 44-77N CMT or a 15_77 CMT your quality is ensured. These machines can be operated by two people at the same time. They will produce one flavor ice cream and milkshakes in any flavor you can imagine. The capacity's of Electro Freeze 44-77N CMT and 15_77 CMT are 60 and 90 liters of ice cream and 160 and 300 milkshakes per hour. Even in rush hours these machines can make more than enough product and your profit will be ensured. Both machines are standard equipped with low mix indicator, and the unique CMT pump, this makes cleaning very easy. . .

WISSELAAR
ICE & COFFEE CONCEPTS

ICE CREAM FROM WISSELAAR, IRRESISTIBLE DELICIOUS

44-77N CMT AND 15-77 CMT

The Electro Freeze 44-77N CMT and 15-77 CMT are non pasteurizing machines. They are especially suited for the unique bag in box system from Wisselaar. The CMT pump will provide a high overrun in your ice cream. These machines will give you a perfect ice cream every time you use them.

Therefore you will always be ensured of a high profit and a perfect quality. Just like all the Electro Freeze ice cream machines the models 44-77N CMT and the 15-77 CMT

have a cooled cabinet for the bag in box storage, Delrin blades and a energy efficient night switch.
